WORK EXPERIENCE

Griffin31	Aug. 2024 – Present
Software Engineer	Full-time

Griffin31 is a cybersecurity company and SaaS that helps organizations find and remediate Microsoft 365 misconfigurations, offering prioritized remediation recommendations, and real-time alerts.

- **Owned full-stack architecture and end-to-end delivery** of production-grade features across **Typescript, NestJS, PostgreSQL, and React**, driving system design, schema evolution, API contracts, frontend integration, and scalable deployment strategies.
- **Designed and implemented CI/CD pipelines using GitHub Actions**, automating build, test, containerization, and deployment workflows to **Azure Container Registry (ACR)** and **Azure Container Apps (ACA)**, significantly improving reliability, consistency, and release speed.
- **Containerized services using Docker**, standardizing development and production environments while enabling reliable, repeatable deployments across staging and live systems.
- **Architected and built automated Microsoft 365 security monitoring pipelines** using Microsoft Graph APIs, eliminating manual review processes and proactively detecting misconfigurations in production environments.
- **Drove security hardening initiatives** by coordinating penetration testing cycles, translating findings into actionable remediation plans, and ensuring implementation across backend and frontend layers.
